## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims **1-5, 7** are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding claim **1**, the prior art of record teaches transmitting telephone services upstream in one wavelength and transmitting video services downstream in a different wavelength on the same optical fiber. The prior art of record fails to teach or fairly suggest "transmitting light at a first wavelength carrying plain old telephone service telephonic signals from a first plurality of telephone related devices and at a second wavelength carrying TV signals from a TV signal source through an optical fiber from a first end to a second end" within the context of the claim. That is, the prior art of record does not teach multiple light transmitted downstream signals at different wavelengths.

Regarding claim **7**, the prior art of record teaches transmitting telephone services upstream in one wavelength and transmitting video services downstream in a different wavelength on the same optical fiber. The prior art of record fails to teach or fairly suggest "an optical fiber suitable for simultaneously carrying two distinct wavelengths of light of a first wavelength and a second wavelength by WDM (wave division multiplexing) between a first location and a second location" and a "conversion apparatus located at said second location and connected to said optical fiber, said conversion apparatus converting optical signals at said first wavelength of light and carrying said unidirectional TV signals to electrical TV signals at a first frequency, converting optical signals at said second wavelength of light and carrying said TCM

bidirectional plain old telephone service telephonic signals to electrical telephone signals, and converting electrical telephonic signals to TCM bidirectional telephonic optical signals at said second wavelength of light” within the context of the claim. That is, the prior art of record does not teach multiple light transmitted downstream signals at different wavelengths.

Claims **2-5** are allowed as being dependent on the aforementioned claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
